

Components marked "\*" are modifications by the Author and thus deviate from the original design.  
 Components marked "\*\*" are added by the Author and not part of the original design.  
 Components marked "\*\*\*" are part of the original design but omitted in the Author's design.  
 See accompanying text.

LED1:  
 use an ultra bright LED with high current limiting resistor. This makes the short sample pulses better visible and decreases load on the OPA
